

Readers Workshop Results

Grade 3

2010-2011 School Year

Running records, which assess student reading levels, were performed three times during the school year by most third grade teachers with all of their students. These occurred at the beginning, middle and end of the year.

Based on a review and analysis of 152 running records for the 2010-2011 school year in grade 3, the following results were found:

- 97% of all students raised their reading levels
- The yearly goal in Readers Workshop is to improve by three reading levels between September and June. This goal was met by our students.
- In addition, 20% of the students improved by 4 or more levels.
- 100% of all students who began grade 3 **below** reading level improved.
