

That's a wrap on the 2024 Great American Eclipse!

Holmdel students grades K-12 enjoyed a variety of classroom lessons and events leading up to Monday's eclipse.

On Friday, April 5th, Village School students were treated to an eclipse assembly given by Ms. Dempsey, Ms. Kerner, and the science squad (Ms. Berardi, Ms. Cooke, Ms. Frothingham, Ms. Rausch, and Ms. Renna). Students learned all about eclipses, eclipse viewing safety, and were treated to a reading of the book, *Eclipse*, by Andy Rash. The students loved learning about eclipses and how to prepare for Monday's event!

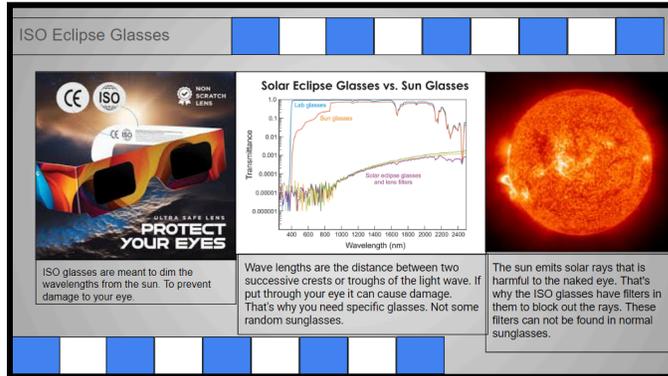

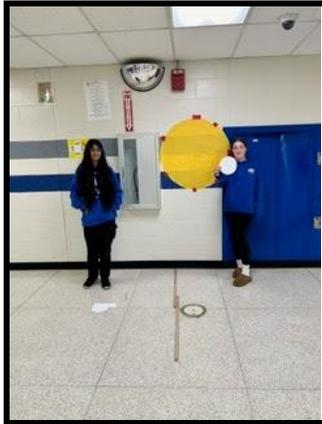

Indian Hill students enjoyed a What's Out There StarLab planetarium assembly during their science classes, and then headed outside prior to dismissal for a school-wide eclipse viewing event.

The students' screams of excitement were contagious as they observed the event with their teachers and peers! The HS TV production class documented Indian Hill's event under the direction of Mr. DeNovellis.

At Satz, teachers took advantage of the days leading up to the eclipse to engage students in eclipse related lessons. For example, students in Ms. O’Keefe’s science class had fun modeling the eclipse, and students in Ms. McCafferty’s technology classes researched the technology behind eclipse glasses and created infographics about ISO certified glasses.

At the High School, Ms. Lee and Ms. Krause organized an eclipse watch for interested students on Roggy Field. The students gathered in the bleachers with their teachers to enjoy the event together. Mr. Mazzeo invited photography students to photograph the event as well!

The eclipse provided an incredible few days full of excitement and learning for our students. Special thanks to all of the teachers for their work in the classroom, and to the teachers and staff who helped to make these events possible!
